Abstract	The OM13285 is a demo kit for PCA9629A stepper motor controller. This quick start guide shows how to operate the stepper motor drive control logic with three pulse width drive formats plus ramp-up and ramp-down features. The motor drive outputs can drive one-phase (wave drive), two-phase, and half-step drive format logic level outputs for stepper motor control modes.

1. Introduction

The PCA9629A is available with a self-contained demo kit (OM13285) that enables detailed evaluation of its operation. The kit includes a motor with position sensors and a demo board with pre-programmed push-button switches that make it easy to select functions. Advanced users can quickly reprogram the on-board microcontroller to evaluate custom functions.

2. PCA9629A demo kit (Rev. 2.2) contents

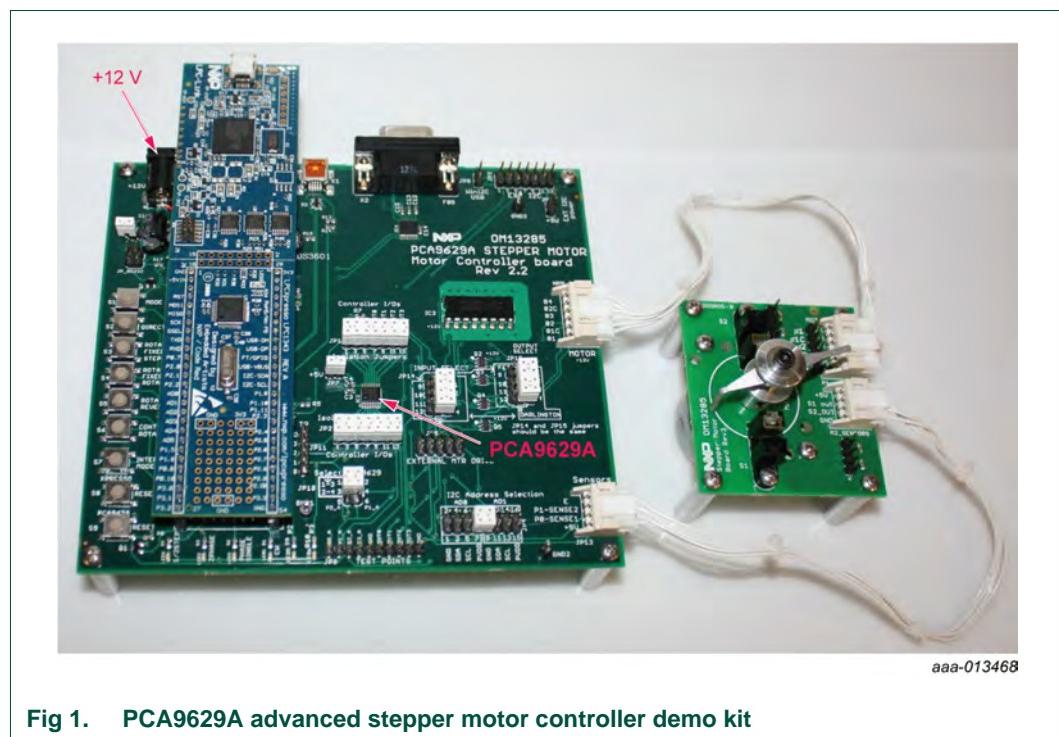

Fig 1. PCA9629A advanced stepper motor controller demo kit

1. PCA9629A demo board with LPC1343 LPCXpresso (software Rev 0.6) daughter board
2. Stepper Motor Board with two sensors
3. +12 V DC power adapter
4. Motor cable (6-wire)
5. Sensor cable (4-wire)

3. Quick start instructions, step-by-step

- Step 1 Connect motor cable (6-wire) and sensor cable (4-wire) as shown in [Figure 1](#).
- Step 2 Connect +12 V power source to the PCA9629A demo board.
- Step 3 You are ready to control the motor as shown in [Table 1](#), [Table 2](#) and [Table 3](#) for each switch function.

Remark: When the board is powered up and operating normally, a Red LED2 on the LPCXpresso LPC1343 daughter card blinks once per second for Demo_Mode_1 as shown in [Table 1](#).

Remark: When 'S1' and 'S2' buttons are pressed at the same time to switch demo function from Demo_Mode_1 to Demo_Mode_2 as shown in [Table 2](#), a Red LED2 on the LPCXpresso LPC1343 daughter card blinks twice per second for this mode. The Demo_Mode_2 is for the ramp-up/ramp-down control as well as user-customized operations.

Remark: When 'S1' and 'S7' buttons are pressed at the same time to switch demo function from Demo_Mode_1 to Demo_Mode_3 as shown in [Table 3](#), a Red LED2 on the LPCXpresso LPC1343 daughter card blinks faster for Demo_Mode_3. The Demo_Mode_3 sets output logic levels on OUT[3:0] pins for GPO function.

Table 1. Demo_Mode_1 functions (power-on default mode; LED2 blinking once per second)

Switch/Label	Demo function	Notes	LED indication
S1/Mode	Motor Phase Mode Select	Default is Single-phase mode. Press to cycle through 2-Phase and ½-Step Modes.	Selected Mode is indicated by the corresponding: LED2 ON = Single-phase LED3 ON = 2-phase LED4 ON = ½-phase
S2/Direction	Motor Direction Select	Default is CW. Press again to switch between CW and CCW.	LED1 ON = CW (clockwise) LED1 OFF = CCW (counter-clockwise)
S3/Rotate Fixed Steps	Rotate Fixed 12 steps Rotation	Rotate a fixed number of steps. Default is 12 Steps (one rotation is 48 steps).	Direction rotated is indicated by CW LED1.
S4/Rotate Fixed Rotations	Rotate Fixed Rotations	Rotate a fixed number of rotations. Default is 10 rotations (480 steps). Press again to change the motor speed between 50 pps and 200 pps.	Direction is indicated by CW LED1.
S5/Rotate and Reverse	Rotate between CW and CCW with delay interval in continuous loop	Continuously rotate 36 steps CW and CCW with delay interval of 128 ms (after CW) and 512 ms (after CCW). Press again to stop motor operation.	Direction is indicated by CW LED1. Time delay between changing directions is set by LOOPDLY_CW/CCW registers.
S6/Continuous Rotation	Continuous Rotation	Continuously rotate and press again to change the motor speed between 50 pps and 200 pps with ramp control. Press either S5 or S8 to stop motor operation.	Direction is indicated by CW LED1.

Table 1. Demo_Mode_1 functions (power-on default mode; LED2 blinking once per second) ...continued

Switch/Label	Demo function	Notes	LED indication
S7/Interrupt Mode	Start/Stop Interrupt Mode	Interrupt Mode. Continuous rotation and reverse motor on interrupt caused by P0 or P1 falling edge. Press again to stop motor operation.	Direction is indicated by CW LED1. Time delay between changing directions is set by LOOPDLY_CW/CCW registers.
S8/Xpresso Reset	To reset LPCXpresso LPC1343	This reset function to bring this demo board to power-on reset default state (Demo_Mode_1)	Xpresso/LPC1343 Reset; this control also resets the PCA9629A device.
S9/PCA9629A Reset	To reset PCA9629A device	This reset is only for PCA9629A device.	Set all registers to power-on default values.

Table 2. Demo_Mode_2 functions (LED2 blinking twice per second)

Switch/Label	Demo function ^[1]	Notes	LED indication
S1/Mode	same as Demo_Mode_1		
S2/Direction	same as Demo_Mode_1		
S3	Ramp control	Ramp-up and ramp-down in 48 steps (1 rotation in 0.5 second) with ramp multiplication value = 9.	Direction is indicated by CW LED1
S4	Ramp control	Ramp-up and ramp-down in 480 steps (10 rotations in 5 seconds) with ramp multiplication value = 6.	Direction is indicated by CW LED1
S5	Available for user-defined function.		
S6	Available for user-defined function.		
S7	Available for user-defined function.		
S8/Xpresso Reset	same as Demo_Mode_1		
S9/PCA9629A Reset	same as Demo_Mode_1		

[1] Press either S8 (Xpresso Reset) or S1 and S2 at the same time to return Demo_Mode_1 function.

Table 3. Demo_Mode_3 functions (LED2 blinking faster)

Switch/Label	Demo function ^[1]	Notes	LED indication
S1	Set OUT0 pin as General Purpose Output (GPO)	Motor output OUT0 (pin 12) goes 'High' while the button is pressed.	n/a
S2	Set OUT1 pin as General Purpose Output (GPO)	Motor output OUT1 (pin 11) goes 'High' while the button is pressed.	n/a
S3	Set OUT2 pin as General Purpose Output (GPO)	Motor output OUT2 (pin 10) goes 'High' while the button is pressed.	n/a
S4	Set OUT3 pin as General Purpose Output (GPO)	Motor output OUT3 (pin 9) goes 'High' while the button is pressed.	n/a
S5	not available		
S6	not available		
S7	not available		
S8/Xpresso Reset	same as Demo_Mode_1		
S9/PCA9629A Reset	same as Demo_Mode_1		

[1] Press either S8 (Xpresso Reset) or S1 and S7 at the same time to return Demo_Mode_1 function.

4. Abbreviations

Table 4. Abbreviations

Acronym	Description
CCW	Counterclockwise
CW	Clockwise
GPO	General Purpose Output
LED	Light Emitting Diode
pps	pulses per second

5.1 Definitions

Draft — The document is a draft version only. The content is still under internal review and subject to formal approval, which may result in modifications or additions. NXP Semiconductors does not give any representations or warranties as to the accuracy or completeness of information included herein and shall have no liability for the consequences of use of such information.

5.2 Disclaimers

Limited warranty and liability — Information in this document is believed to be accurate and reliable. However, NXP Semiconductors does not give any representations or warranties, expressed or implied, as to the accuracy or completeness of such information and shall have no liability for the consequences of use of such information. NXP Semiconductors takes no responsibility for the content in this document if provided by an information source outside of NXP Semiconductors.

In no event shall NXP Semiconductors be liable for any indirect, incidental, punitive, special or consequential damages (including - without limitation - lost profits, lost savings, business interruption, costs related to the removal or replacement of any products or rework charges) whether or not such damages are based on tort (including negligence), warranty, breach of contract or any other legal theory.

Notwithstanding any damages that customer might incur for any reason whatsoever, NXP Semiconductors' aggregate and cumulative liability towards customer for the products described herein shall be limited in accordance with the *Terms and conditions of commercial sale* of NXP Semiconductors.

Right to make changes — NXP Semiconductors reserves the right to make changes to information published in this document, including without limitation specifications and product descriptions, at any time and without notice. This document supersedes and replaces all information supplied prior to the publication hereof.

Suitability for use — NXP Semiconductors products are not designed, authorized or warranted to be suitable for use in life support, life-critical or safety-critical systems or equipment, nor in applications where failure or malfunction of an NXP Semiconductors product can reasonably be expected to result in personal injury, death or severe property or environmental damage. NXP Semiconductors and its suppliers accept no liability for inclusion and/or use of NXP Semiconductors products in such equipment or applications and therefore such inclusion and/or use is at the customer's own risk.

Applications — Applications that are described herein for any of these products are for illustrative purposes only. NXP Semiconductors makes no representation or warranty that such applications will be suitable for the specified use without further testing or modification.

Customers are responsible for the design and operation of their applications and products using NXP Semiconductors products, and NXP Semiconductors accepts no liability for any assistance with applications or customer product

design. It is customer's sole responsibility to determine whether the NXP Semiconductors product is suitable and fit for the customer's applications and products planned, as well as for the planned application and use of customer's third party customer(s). Customers should provide appropriate design and operating safeguards to minimize the risks associated with their applications and products.

NXP Semiconductors does not accept any liability related to any default, damage, costs or problem which is based on any weakness or default in the customer's applications or products, or the application or use by customer's third party customer(s). Customer is responsible for doing all necessary testing for the customer's applications and products using NXP Semiconductors products in order to avoid a default of the applications and the products or of the application or use by customer's third party customer(s). NXP does not accept any liability in this respect.

Export control — This document as well as the item(s) described herein may be subject to export control regulations. Export might require a prior authorization from competent authorities.

Evaluation products — This product is provided on an "as is" and "with all faults" basis for evaluation purposes only. NXP Semiconductors, its affiliates and their suppliers expressly disclaim all warranties, whether express, implied or statutory, including but not limited to the implied warranties of non-infringement, merchantability and fitness for a particular purpose. The entire risk as to the quality, or arising out of the use or performance, of this product remains with customer.

In no event shall NXP Semiconductors, its affiliates or their suppliers be liable to customer for any special, indirect, consequential, punitive or incidental damages (including without limitation damages for loss of business, business interruption, loss of use, loss of data or information, and the like) arising out the use of or inability to use the product, whether or not based on tort (including negligence), strict liability, breach of contract, breach of warranty or any other theory, even if advised of the possibility of such damages.

Notwithstanding any damages that customer might incur for any reason whatsoever (including without limitation, all damages referenced above and all direct or general damages), the entire liability of NXP Semiconductors, its affiliates and their suppliers and customer's exclusive remedy for all of the foregoing shall be limited to actual damages incurred by customer based on reasonable reliance up to the greater of the amount actually paid by customer for the product or five dollars (US\$5.00). The foregoing limitations, exclusions and disclaimers shall apply to the maximum extent permitted by applicable law, even if any remedy fails of its essential purpose.

Translations — A non-English (translated) version of a document is for reference only. The English version shall prevail in case of any discrepancy between the translated and English versions.
